OUR COMPANY

Australian Turntables is a world renowned company specialising in rotational movement systems.

We provide turntables to a wide range of industries from construction sites and commercial parking, to rotating displays and residential driveways, making life easier by maximising space and increasing efficiency in the safest way possible.

Our team provide straightforward, practical solutions, and support to our clients from the initial concept of a project through to completion as well as on going after installation.

OUR HISTORY

Established in 1987, Australian Turntables was founded through a willingness to adapt and simplify processes thinking to engineer smart, long lasting solutions.

We design and manufacture all of our products in Australia, and can supply solutions for any project, across any industry, anywhere in the world.

OUR VALUES

At Australian Turntables, we understand the impact and quality of your supply chain impacts the success of your project.

That's why we bring global expertise and deliver long term value with our products. We embrace challenges, and continually innovate to imagine better solutions.

We're not interested in "one and done" sales, but rather in building lasting relationships with our clients, making their life easier which is what they have come to expect.

It's simple, for us, every detail counts we work out the complexities, so you don't have to.

OUR LOCATIONS

Our innovative solutions are built to turn the world around, the Australian way.

With knowledge and experience across a range of industries, and our global distribution network, we have delivered projects to over 22 countries for some of the world's best companies.

OUR FOCUS

Our key focus is our customers' needs after all, where would we be without them?

For us, helping customers achieve the best results means also having a strong focus on improving safety, saving space, and increasing productivity.

By focusing on the specific details of our customers' needs, our team works to develop the most practical and efficient design for your space, so you can achieve the best results.

OUR CLIENTS SAY

'I have worked with Australian Turntables for over three years and can say with confidence that the products that have been supplied, installed and maintained have been of a superior standard'.

MICHAEL CARTISANO
Senior Site Manager
Lendlease

OUR QUALITY

Our products are designed and manufactured locally in Australia using the highest quality products, giving you a solution that's built to last.

We are accredited with the following Australian and international standards:

- AS 4024
- ISO 9001:2015
- ISO 14001:2015
- ISO 45001:2018

WHY AUSTRALIAN TURNABLES

Australian Turntables will work with you to design a unique solution that generates revenue and impresses clients.

Revolving platforms for commercial developments attract plenty of attention - and new customers; this alone is a major advantage for your prospective clients. Australian Turntables works with architects to develop customised products that maximise space and result in convenient, elegant solutions for a variety of challenges. These solutions provide an attractive return on investment and increase revenue throughout the lifetime of a building.

Our team has installed revolving restaurants and specialty rooms across the globe, including the world's largest 50-meter diameter turntables at Milad Tower, also two amazing rotating auditoriums at the Adelaide Convention Centre.

CASE STUDY ADELAIDE CONVENTION CENTRE

Architect: Woods Bagot & VX3 Architects, London

Structural Engineer: Aurecon

Builder: Lendlease

Client: Department of Planning, Transport, and Infrastructure, South Australia

Project Completion: 2017,

Structure: 2x18 metre rotating drums, tiered frame, and operable walls.

The Adelaide Convention Centre redevelopment was a renovation of the original centre that was built in 1987. This multi-purpose, state-of-the-art facility needed greater capacity and flexibility to accommodate large, medium, and small events.

The final solution culminated in a combination of hinged seating, operable walls, and rotating seating drums that allow groups to be arranged into more than 15 different configurations. This flexibility attracts organisers to the beautiful city of Adelaide, generating better opportunities and greater revenues for the client.

This project features the world's largest rotating seating drums two revolving auditoriums capable of seating 320 people each, both of which were supplied by Australian Turntables.

Set at the back of the Hall, the rotating drums can be used as part of the main auditorium or rotated 180 degrees in mere minutes to form two individual theatrettes.

Australian Turntables worked with the architect and builder from concept to construction, helping to ensure that safety and quality were delivered alongside innovative rotating machinery.

If you are looking for unique solutions that will set your projects apart from the competition, please contact us and we can work together to formulate smart, customised products.

Re: Testimonial – Australian Turntables

Dear prospective Australian Turntables partner,

Bendigo Tech School was proud to collaborate with Australian Turntables to create our bespoke lifting exhibition turntable. This beautifully crafted architectural feature was designed to complement the high-tech, flexible learning environment of the Tech School.

The turntable allows us to instantly create elevated seating or exhibition display space. Some of the side panels are clear, enabling the lifting mechanism to act as an educational tool. This dynamic building feature is a highlight of any Tech School tour.

The Australian Turntables design team listened carefully to our brief and delivered a quality project of commendable precision, working tirelessly to perfect the installation. As industry partners, we often tell local students about the role this unique company plays in making the building and construction sector safer and more efficient.

This showcase project is a tangible representation of the strength of our industry partnerships and the importance of innovation in the Bendigo region.

We highly endorse Australian Turntables for their innovative solutions and specialist expertise in this field.

Yours sincerely,

Graeme Wiggins
Director, Bendigo Tech School

AUSTRALIAN TURNTABLES

PROUDLY AUSTRALIAN MADE & OWNED

At Australian Turntables, all of our products are proudly designed and manufactured right here in Australia. This means we invest in our local community, reduce environmental costs, and, in our humble opinion, build a better product. Our turntables are the result of years of risk taking, innovation, adaptability, mateship and bloody hard work!

Australian born and Australian made, we are constantly searching for simple, straightforward, practical solutions that make your life easier and more efficient giving you more time for what really matters.

Quality assured – The Aussie Way

Safety comes first

Be it construction sites, airport parking, rotational displays, loading docks, or residential driveways, we don't compromise on quality or safety, and choose to use local products and services to manufacture our products, we also source our staff locally. Our inhouse engineers combine industrial design and engineering to produce the highest quality products. We approach challenges and complex problems with innovative solutions that are built to turn the world around, the Australian way.

The Australian Made license has been assessed in accordance to the AMAG code of practice. Licensee ID number: 13153

QUALITY & WARRANTY

Our products are engineered to last.

Australian Turntables quality is backed by our two year warranty on all moving parts, and a 10 year warranty on our structures.

We offer an extended warranty on moving parts to five years, for all customers who engage in an annual service (conducted by Australian Turntables Service Agent) for this period.

The annual services can be included in your initial purchase to lock in current service rates.

Subject to warranty terms and conditions.
